

Python Statements:

```
ch = input("Enter a letter:")
while ch != " ":
    if ch == "a" or ch == "A":
        print(ch, "is a vowel")
    elif ch == "e" or ch == "E":
        print(ch, "is a vowel")
    elif ch == "i" or ch == "I":
        print(ch, "is a vowel")
    elif ch == "o" or ch == "O":
        print(ch, "is a vowel")
    elif ch == "u" or ch == "U":
        print(ch, "is a vowel")
    elif ch == "y" or ch == "Y":
        print("Sometimes", ch, "is")
    elif ch == "a" and ch != "z" and len(ch) == 1:
        print("consonant")
    elif ch == "A" and ch != "Z" and len(ch) == 1:
        print("consonant")
    else:
        pass
```

Print ("That wasn't a valid letter.")

```
ch = input("Enter a letter: ")
```

Statement number:

[illegible]

Write the Python statements for your solution (using the dashed vertical lines to guide the placement of any indented statements). Then write down the statement number shown in your exam question booklet for each statement and shade the digit(s) corresponding to each statement number. Blank lines will be ignored, as will any lines where the statement number has **not** been shaded.
