

You can find multiple choice review questions (when they are available) in D2L under:
Assessments->Quizzes

For all questions, unless otherwise specified assume that there are no syntax errors in any programs or program fragments.

Short answer:

JT's hint: Before looking at the answer make a real attempt at providing an answer. If you are drawing a blank then it indicates that you need to study the material from lecture as well as looking at the in class notes that you should be taking as you are following along in class. You will get far more out of the process if you try it out as if you were writing an actual exam question rather than just directly looking at the answer.

(Solution is on the next page)

- With agile, only a part of the project is implemented at a time.
- In contrast the entire project is implemented all at once using the waterfall approach.
- It's easier to make changes to a part of the program than the whole thing at once.
- (Side note not required for your answer: this is one major reason why it's named 'agile' – developers can more nimbly adapt to necessary changes).
