You can find multiple choice review questions in D2L under: `Assessments->Quizzes`

For all questions, unless otherwise specified assume that there are no syntax errors in any programs or program fragments.

Special formatting characters:

- `<TAB>` = tab
- `<SP>` = space
- `<EOL>` = end of line character / new line (same formatting effect as hitting enter)
- Special characters need not be specified for the automatic EOL added by print

Short answer 1 (code writing):

JT's hint: Before looking at the answer make a real attempt at providing an answer. If you are drawing a blank then it indicates that you need to study the material from lecture as well as looking at the in class notes that you should be taking as you are following along in class. You will get far more out of the process if you try it out as if you were writing an actual exam question rather than just directly looking at the answer.

(Solution is on the next page)

```
t<TAB>\<EOL>
...
```

Short answer 2 (code tracing):

Specify the output of the output of the following program in the space provided.

(Solution is on the next page) (Solution is on the next page)

```
-7<EOL>d<TAB>miley
\<SP>sheen'51<SP>0.33
```
